

Victor I. Kleshch received his PhD degree in physics from Prokhorov General Physics Institute of the Russian Academy of Sciences in 2010. After then, he took the position of Research Associate which he currently holds at Physics Department of Lomonosov Moscow State University. His scientific interests include synthesis and study of electronic properties of nanostructured materials. Main topic of his research is field electron emission from nanocarbon materials and their application in vacuum electronics.
